# Multiple Sclerosis Awareness Charity Treasure Hunt 2010

Klang Valley 9<sup>th</sup> October 2010

## INFORMATION

More than 2.5 million people around the world are estimated to suffer from Multiple Sclerosis (MS), a serious, life-long and disabling disease of the central nervous system, which consists of the brain, spinal cord and optic (eye) nerves. MS strikes people in the prime of their lives – at a time when they are building their careers and families. In fact, it is the most common neurological disease to affect young adults, particularly women.

The cause of MS is still unknown, but studies suggest that it can be hereditary, and that genetics, a person's environment and even a virus may play a role. While multiple sclerosis is a life-long disease, studies have found that early and continued treatment can effectively enable people living with multiple sclerosis to lead active, productive and fulfilling lives.

Persatuan Multiple Sklerosis Malaysia is pleased to invite you to join us in our efforts to enhance the awareness and understanding of the disease in Malaysia, as well as impart a sense of hope to people living with MS and their families. Join us in our MS Awareness Treasure Hunt.
